EDUCATION

University Of California, Irvine   **Expected June 2025**
Bachelors of Science in Software Engineering
Relevant Coursework: Python, C++, Java, Discrete Math, Linear Algebra, Computer Organization

Professional Experience

New Age International Publishers Pvt Ltd.   **June 2022 – September 2022**
Intern   *New Delhi, India*
- Developed an automated script to automatically notify customers of outstanding fees and impending deadlines in python using textlocal API.
- Coordinated and facilitated company meetings using Zoom.

Associated Students of University of California Irvine   **September 2021 – June 2022**
Staffer   *Irvine, CA*
- Collaborated with colleagues and ASUCI Senate to plan and execute large-scale events such as escape room and prom, engaging over 500 university students.
- Conceived and implemented a proficient event template, streamlining office organization and event management.
- Administered and allocated a university-provided budget of $3000.

Projects

Techtern Insight
- Spearheaded a team of 5 students to design a comprehensive tool for software engineering internship seekers.
- Used BeautifulSoup4 and selenium to scrape Glassdoor listing, while using SQL to store these listings.
- Showcased the listings through a user friendly front end made with Flask.

Proof By Receipt
- Developed a decentralized application for verified anonymous restaurant reviews by deploying a Solidity-based smart contract on the blockchain.

Webreg
- Redesigned the UC Irvine's current class registration system and developed a prototype using Justinmind.
- Awarded the OOTify Challenge Winner title at the Webreg Hackathon hosted by ANTrepreneur Center at University of California, Irvine.

Therapy Bot
- Developed an AI bot that analyzes Twitter user's emotions by reading their tweet using Python, Twitter API, and OpenAI's Chat GPT.

Creativity Outlets

- Established a significant presence as a Video Creator on YouTube, garnering 1.8 million views and attracting 4000 subscribers through engaging content creation.
- Authored and published an online book, which has been read and appreciated by over 300,000 readers.

SKILLS

- **PROGRAMMING LANGUAGES:** Python, C++, Java, JavaScript, MySQL, HTML, CSS
- **LANGUAGES:** English (Fluent), Hindi (Fluent), German (Intermediate)
